- Responsive Web Design, FreeCodeCamp, 2022

- Complete Data Analytics Course in Excel, Udemy, 2022

- Build An Interactive Data Analytics Dashboard with Python, Udemy, 2022

About Me

Computer has always fascinated me. That a machine could do so much with simple clicks and at an amazing speed blew me away. So I looked for a niche in this ecosystem. Web development and Data Analytics are my obvious choices..
My core competence is in Python, SQL, HTML, JavaScript, Microsoft Excel, and Data Visualization (Dash, Matplotlib, and Streamlit).

Professional Experience

QwestStore Ecommerce Website

Key responsibilities:
- Designed the front-end using HTM5, CSS3 , Bootstrap and JavaScript
- Developed the backend logic for features like signup/login email verification, store and cart dynamic features, security measures using Django framework and PostgreSQL
- Deployed the application on AWS Elastic Beanstalk (EB)
- Integrated PayPal payment gateway

Analysis of World Happiness Data (2015-2017)

Key responsibilities:
- Worked in Jupyter notebook
- Used pandas to create dataframe, clean, sort and filter data.
- Analyzed and visualized the data to find correlation between and amongst geographic, demographic, and/or economic factors that contribute to a happier life.

Travellers' Blog

Key responsibilities:
- Based on Django, PostgreSQL, HTML, CSS, Bootstrap and JavaScript
- Provided signup /login features, ability to Create. Read, Update and Delete posts, restriction measures
- Configured AWS S3 Bucket for storing media files.
- Deployed the project on Railway via Git version control

Web Scraping

Key responsibilities:
- Scraped several websites using BeautifulSoup, Selenium and Scrapy.
- Converted the output into csv for analysis.
